

Wheelie Bin Summary Specification and Pricing Sheet

Features

- Manufactured and tested to EN840 - DIN30700. EN840 is the Europe wide standard for emptying interoperability and handling safety.
- Extra strength comb lift bar.
- Made from virgin material only for extra strength and life.
- Full thickness “flat body” design. Other bins, with “fluted bodies” that are much thinner, won’t last as long.
- Maximum strength additives for resistance to UV, cold, heat and chemicals (no corners cut).
- Solid steel galvanised wheel axle (2 wheel bins) with solid wheel tyres.
- Certified compliant with EU Noise Protection Directive.
- 100% recyclable at end of life.
